

# Benefits of CI/CD for UdaPeople Software Company

UdaPeople Software Services Company

## 1. Faster time to market

With CI/CD, our company can get products and value to our customers faster because of automation and removal of manual processes. This yields greater revenue.

## 2. Failing fast

CI/CD provides the necessary environment to reduce the time developers spend on issues resulting from new code. This reduces cost for our organization.

## Less bugs in production

With CI/CD, our organization can avoid cost. This is possible because CI/CD helps to automate the process of testing our developers' code to reduce bugs in production and also reduce the time spent on testing.

## Reduce deployment downtime

CI/CD is such a great solution to solve the problem of deployment downtimes experienced in production environments. CI/CD provides automated processes that reduces downtime from a deploy-related crash or major bug. This helps to protect the revenue of our organization.
